. Testimonials

"It's fabulous! SIPs are a proven technology that deserve much greater application in the building industry." -
Bob Villa of Home Again

Your home kit makes such a strong and sturdy house, it's unbelievable. And its ease of use is incredible. It is superior to anything that I've built with before or what I expected -
Pete S, Bailey CO

The system was pretty easy to put up. I built it for resale. A tiny little heater worked for heating the whole house in the winter when they were building it. The homeowners got a \$400 rebate from the electrical company because they were using SIPs. I recommend it to people all the time - **Ralph D, Monterey TN**
